Re: Seed Certification

Dear Farmer,

We are providing this statement for clients regarding our production process to create industrial hemp seeds. Please use this letter in combination with your paid invoice (accessible through our electronic invoicing system) to demonstrate organic compliance to your certifying agency / organization. Our company offered the following seed varieties to farmers for the 2019 production season:

- (1) Suver Haze
- (2) Special Sauce
- (3) Lifter
- (4) Sour Space Candy
- (5) Elektra
- (6) Hawaiian Haze
- (7) RNA
- (8) White CBG 19
- (9) White CBG 34
- (10) White CBG 86
- (11) White CBG 103

We are confirming that all of our seeds are: (1) untreated in any way, (2) produced using organic methods, and (3) contain no transgenic modifications (i.e. "non-GMO"). Please let us know if you have any further questions about our production methods.
